

Case Study: Orbus Medical

Business:
Cardiovascular Devices

Challenge:
Ensure no failures during physical fatigue testing

Solution:
Virtually test for durability, fatigue, and performance of stent using MSC simulation services

Value:
Validate final design rather than a number of physical prototypes, Reduced costs and time-to-market

“Our MSC.Software simulation consultant has been a valuable resource in understanding both the FEA model and the stent itself.”

-- John Pazienza
Engineering Manager, **Orbus**
